- It is copied

Objective

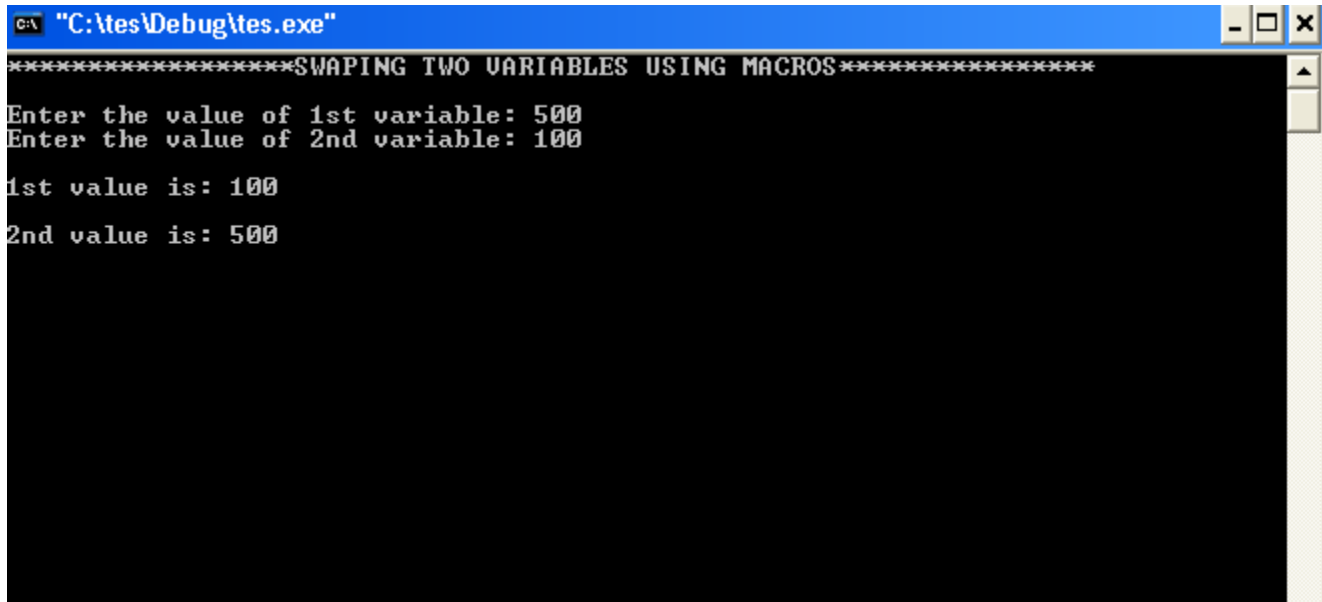

The objective of this assignment is to provide hands on experience on some of the essential windows programming concepts and macros.

Q1: Develop a win32 application that can create a message box with title “Virtual University” and text as “My first Windows Message Box” having three buttons Abort, Retry and ignore:

[10 marks]

Q2: Develop a program using macros which takes two variables from user and swap both the variables. **[10 marks]**

```
C:\tes\Debug\tes.exe
*****SWAPING TWO VARIABLES USING MACROS*****
Enter the value of 1st variable: 500
Enter the value of 2nd variable: 100
1st value is: 100
2nd value is: 500
```

For creating the project using Visual C++, Please visit

<http://vulms.vu.edu.pk/courses/win32/buildapp/default.htm>

What to submit

Make 2 projects for 2 questions. Delete the Debug folders in each projects' workspace to reduce the size and then add both the projects' workspaces in a single folder. ZIP that folder and send it as your assignment.
